

SaralSahayta

India's AI-Powered Scheme OS

- Democratizing access to 5,000+ welfare programs for **1.4 billion** citizens
- Unified discovery engine matching individuals to scholarships and financial aid
- Matches users in under 2 minutes
- Bridges the digital divide
- Intelligent automation

OUR DIFFERENTIATION

From Search Chaos to Intelligent Discovery

The Problem

- Fragmented landscape: **5,000+** schemes across **200+** portals
- Traditional keyword search creates a **73%** awareness gap
- Eligible beneficiaries unaware of life-changing opportunities

Our Solution

AI-powered discovery finds the right schemes for you.

- **Offline-First Access:** SMS/USSD for rural connectivity
- **Document Intelligence:** Guides users to obtain missing certificates
- **Zero Learning Curve:** Works in 22 Indian languages

Powerful Features for Every Citizen

AI Eligibility Match

- AI-powered unified platform
- Aggregates **5,000+** schemes across India
- Covers Central and State **government schemes**
- Includes **private scholarships** and **NGO programs**

Multi-lingual Voice Bot

- Full linguistic accessibility
- Easy navigation in **native language**
- Inclusive access for every citizen in **22 language**
- Use in your own language.

Family Profile Vault

- Securely **store family details** and **documents**
- Streamlined submissions **for multiple family applicants**

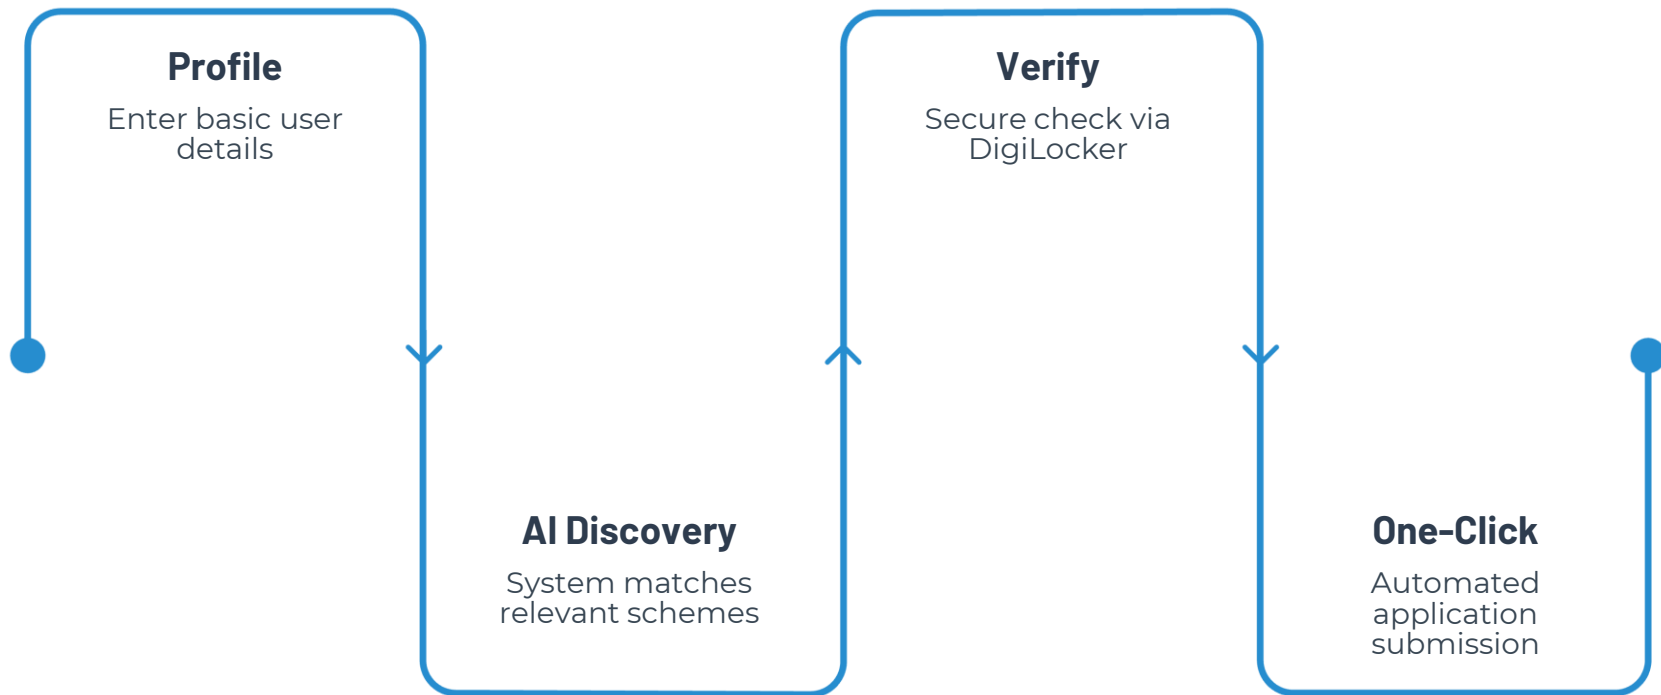

Document Intelligence

- Track required documents
- Step-by-step procurement guides (**150+ types**)
- Online and offline application paths
- **DigiLocker** integration
- AI verification

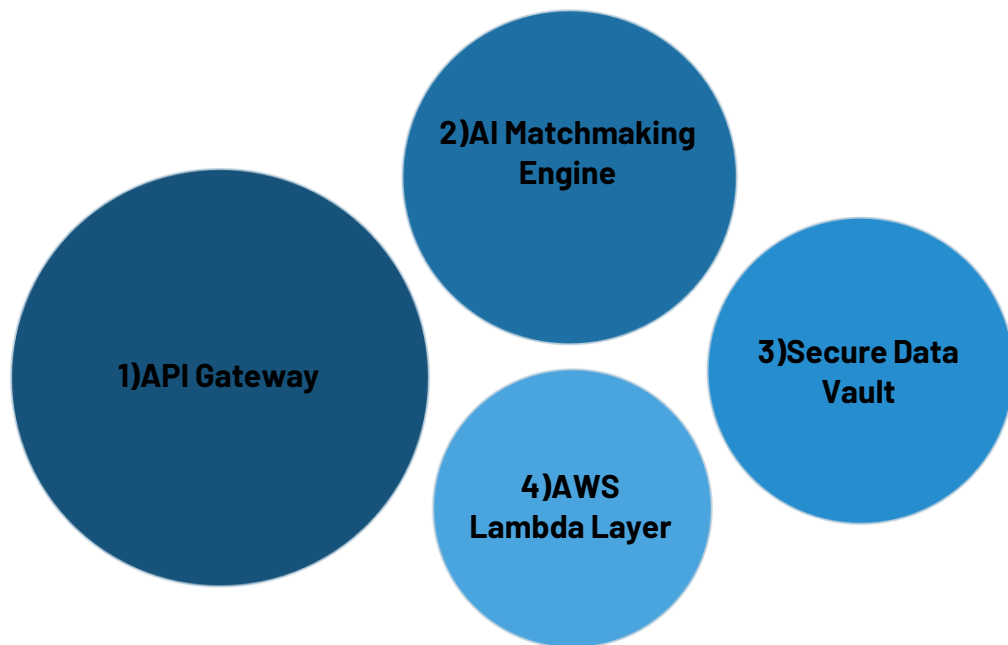

Simple Journey, Powerful Results

Our intelligent workflow transforms the complex welfare application process into four seamless steps, reducing friction and maximizing success rates.

The entire process takes under 5 minutes for most users, with our Document Intelligence feature guiding applicants on how to obtain any missing certificates from government offices.

Scalable Cloud-Native Architecture

Built for Scale & Security

AWS ensures **99.9%** uptime with strict DPDPA 2023 compliance for data privacy.

- 1) API Gateway manages **10,000+** requests per second
- 2) Matchmaking Engine processes profiles in **milliseconds**
- 3) Encrypted Data Vault protects sensitive citizen information
- 4) Auto-scaling **handles traffic spikes** during scheme launches

Modern Tech Stack for Maximum Impact

Frontend

- 1) **React Native** → mobile application
- 2) **Next.js** → responsive web interfaces

Backend

- 1) **Node.js** → API services
- 2) **FastAPI** → building rest & ML APIs

AI/ML

- 1) **TensorFlow** → matching algorithms
- 2) **Hugging Face NLP** → translate languages

Infrastructure

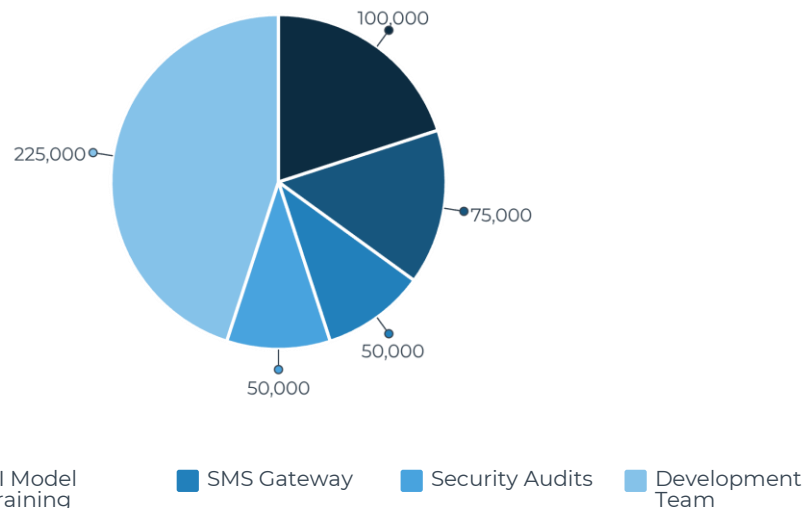

- 1) **AWS Lambda** → serverless
- 2) **MongoDB** → flexibility
- 3) **Redis** → caching

Every technology choice prioritizes reliability, security, and the ability to serve millions of concurrent users across India's diverse connectivity landscape.

Future projection budget requirement

Strategic Budget Allocation

- 1) Cloud Infrastructure – ₹1,00,000 **(20%)**
- 2) AI Model Training – ₹75,000 **(15%)**
- 3) SMS Gateway – ₹50,000 **(10%)**
- 4) Security Audits – ₹50,000 **(10%)**
- 5) Development Team – ₹2,25,000 **(45%)**

Phase 1: Foundation

Core platform development, initial AI training, security infrastructure

Phase 2: Scale

Multi-language expansion, SMS gateway integration, pilot deployments

Transforming Lives at Scale

Year	Users Reached	Funds Facilitated	Match Accuracy
Year 1	100k users	₹75 crore	80%
Year 2	1M users	₹750 crore	88%
Year 3	3M users	₹3,000 crore	93%

Saral Sahayta is redefining how India connects citizens to opportunity. By removing **complexity, language barriers**, and **middlemen**, it turns government welfare into a seamless digital experience. This isn't just access — it's **empowerment, transparency**, and **dignity** delivered through technology.
